FIRST FILM. THEN MUSIC. NOW PUBLISHING.

THE NEXT INDIE REVOLUTION

Following in the footsteps of film and music, publishing is "going indie." Author Solutions, Inc. (ASI) through its industry leading imprints; AuthorHouse, iUniverse, Trafford, and Xlibris; is helping more first-time and experienced authors publish, market, distribute and sell their books to readers worldwide.

Authors who publish "indie" retain control of their content and design of their works. As well, indie authors retain all rights to their published works allowing them to shop for advances from traditional and foreign publishers or sell film rights. Books published through indie publishers generally get to market more quickly and authors receive higher royalties for each copy sold.

Like indie filmmakers and musicians, authors invest in their work because they believe in it. Indie authors choose to work around the endless rejections common with traditional publishers. Instead of patiently awaiting the next rejection letter from a large publisher, indie authors bring their books to the marketplace and let readers decide if they like them. Indie book publishing empowers authors, not publishers, to take control.

Declare your independence.
